

Yu Jie Zhu

Desktop Support / IT Support Engineer

Dalian, Liaoning, China

☎ (+86) 155-2385-6350 | ✉ init233@outlook.com | 📱 libiunc

Endpoint support, network troubleshooting, access management, and service operations

Profile

Experience supporting office endpoints, peripherals, network access, and business accounts. Able to troubleshoot operating systems, drivers, common software, network connectivity, and account login issues. Familiar with VLANs, VPNs, firewalls, and basic Linux troubleshooting. Able to provide remote or on-site technical support, document troubleshooting steps, and use Shell/Python to write service checks, log collection, and process recovery scripts. Experience deploying Docker services and maintaining technical documentation.

Work Experience

Susanbell

Liaoning, China

Desktop Operations and Business Systems Support

Jun. 2025 - Jul. 2026

- Maintained office computers, monitors, and common peripherals; handled operating system, driver, software installation, and daily-use issues
- Maintained office network access and configured VLAN, VPN, and firewall rules; troubleshoot endpoint connectivity, cross-border access, and service connection issues
- Handled business-platform account provisioning, permission changes, login issues, and access revocation after personnel changes
- Provided remote and on-site support for endpoint, network, and software issues; documented troubleshooting steps across endpoint, network, and service layers

PLCT, Institute of Software, Chinese Academy of Sciences

Beijing, China

Linux Systems Technical Support Intern

Sep. 2024 - May 2025

- Configured RISC-V and ARM development environments and cross-compilation toolchains; maintained OpenWrt/Armbian system images and build documentation
- Used QEMU, GDB, system logs, and kernel output to troubleshoot boot failures, driver issues, and system-runtime problems
- Participated in English code reviews, maintained the ImmortalWrt user FAQ, and submitted fixes upstream

Relevant Technical Practice

Local AI Avatar Livestreaming System

Service Deployment and Runtime Support

Jun. 2025 - Jul. 2026

- Deployed LLM, GPT-SoVITS, and livestreaming services on edge devices; configured Docker runtime environments and service dependencies
- Wrote Shell/Python scripts for service startup, status checks, log collection, and process recovery; completed a continuous six-hour runtime validation
- Documented installation and troubleshooting procedures to support repeatable deployment and subsequent issue analysis

OpenWrt / Armbian Multi-Platform Environment

System Maintenance and Documentation

Sep. 2024 - May 2025

- Maintained system configurations, image builds, and test environments for TH1520, SG2000, JH7110, and MT798x platforms
- Used serial console output, system logs, and QEMU/GDB debugging results to troubleshoot boot and driver issues
- Maintained the ImmortalWrt user FAQ and documented configuration methods and troubleshooting procedures

Education

Dalian University of Technology City Institute

B.Eng. in Computer Science and Technology (Big Data)

Dalian, Liaoning, China

2021 - 2025

Skills

Desktop and Endpoints	Basic Windows/Linux endpoint maintenance, office computers and peripherals, OS/driver/software installation, endpoint troubleshooting
Network Support	TCP/IP fundamentals, basic DHCP/DNS troubleshooting, VLAN/VPN/firewall configuration, Linux networking tools, connectivity troubleshooting
Accounts and Support	Business-platform account provisioning, permission changes, login troubleshooting, access revocation after personnel changes, remote/on-site support, incident documentation
Systems and Automation	Linux administration, Shell/Python, Docker service deployment, log collection, health checks, and process recovery
Tools and Collaboration	Git, QEMU/GDB, remote support, FAQ and technical documentation, English technical documentation, and code review
Languages	Chinese (native); English: proficient in using English, reading English technical documentation and technology forums, and communicating in English relatively fluently

Certificates & Awards

2024	Bronze Medal, Liaoning Province 2nd Vocational Skills Competition (Cloud Computing)	Liaoning
	National Second Prize (twice), Computer Board-Game Competition (International Checkers; team captain and sole developer)	China
2022/2024	Provincial Second / Third Prize, Computer Board-Game Competition (International Checkers)	Liaoning
2022	Provincial Third Prize, 13th Lanqiao Cup, C/C++ University Group B	Liaoning

Professional Credentials

Valid	
through	HCIA-Datacom (Huawei certification)
Jan. 2027	Information Security Administrator (Level 3 / Advanced Worker) CET-4 (433)
